PROFILE

Experienced software engineer with a passion for developing high-quality, scalable and user-friendly applications. Proficient in html, css, javascript. Proven track record of success in delivering complex projects on-time, utilizing Agile and Scrum methodologies. Strong problem-solving skills and ability to work effectively both independently and as part of a team. Seeking a challenging role in a dynamic and fast-paced environment where I can continuously learn, grow and make a positive impact.

WORK EXPERIENCE

Software developer (Full stack)

Andela, Rwanda   2021 Nov - 2022 Jun

- Designed UIs and implemented them to create a seamless user experience
- Developed Rest APIs and ensured efficient consumption by the front-end, working with various back-end technologies such as databases, servers, and frameworks
- Reviewed team mate's code to ensure adherence to standards and consistency with project goals, demonstrating strong attention to detail and knowledge of best practices in software development
- Developed expertise in UI design, API development, and code review through experience in full-stack development, making me a valuable addition to any software development team.

Software developer (Front-end)

PESA CHOICE   2022 Jun-2022 Oct

- Converted UI designs into web pages using React JS and Tailwind
- Developed test automation using Test Cafe to ensure quality control and prevent regressions
- Applied best practices in coding and design to ensure maintainability and scalability of codebase
- Collaborated with other developers and stakeholders to ensure the final product met all requirements and goals.

Software developer (Full stack)

MIU EXPRESS, Singapore   2022 Oct - Present

- Developed WordPress websites using HTML5, CSS, and Bootstrap to create responsive and visually appealing user interfaces
- Implemented a PHP and MySQL-based backend to manage data and ensure the website's scalability, security, and reliability
- Maintained existing WordPress websites, ensuring their continued functionality and addressing any issues or bugs that arose
- Worked in Agile methodology, collaborating with cross-functional teams to prioritize tasks, identify requirements, and deliver quality products on time
- Utilized best practices in coding and design to ensure maintainability and scalability of the website, and incorporated user feedback to improve the overall user experience.
